Subject Index of Volume 48

Acid–base equilibria
polyaniline in solution; characterization of, by means of optical and ESR spectroscopy, 241
Alkali metal
synthesis of new ternary, GICs at high pressures, 247
Aluminium
structure investigation of $Ti(OBu)_4$–$AlEt_3$ catalyst before and after heat treatment, 49
three-dimensional structure of $AlCl_3$ in stage-1 $AlCl_3$-GIC, 99
Arsenic
Shubnikov–de Haas oscillations in stage-1 AsF_5 intercalated graphite, 161

Charge transfer interactions
and redox states in poly(*N*-methylaniline) and its complexes, 231
Conductive polymers
cyclic spectrovoltammetry; new method to study redox processes in, 181
Conductivity
of poly(*N*-hydroxypyrrole) and poly(3-phenyl-*N*-hydroxypyrrole), 65
Counter-anion exchange
memory effect of electrical conductivity upon, of polypyrrole films, 337
Counter-ion
role of, in preparation of polypyrrole films with enhanced properties using pulsed electrochemical potential, 203
Counter-ion induced processibility
of conducting polyaniline and of conducting polyblends of polyaniline in bulk polymers, 91
Crystal structure
of TCNQ derivatives with π-extended systems containing S atom, 59
Cyclic spectrovoltammetry
new method to study redox processes in conductive polymers, 181

D.c. conductivity
in poly(3-alkylthiophenes), pressure dependence of, 313
Defect states
in poly(*para*-phenylene) sulfide model compounds, 283
o,o'-Dihydroxyazobenzene
intrinsically semiconducting coordination polymers of Fe(II)/Fe(III) mixed-valence complexes of, 325
1,6-Dipyrrol-1-yl-2,4-hexadiyne
preparation and characterization, 295
Dodecyl sulfate
role of ion exchange in redox processes of polypyrrole/dodecyl sulfate films as studied by electrogravimetry using quartz crystal microbalance, 259

Electrical conductivity
memory effect of, upon counter-anion exchange of polypyrrole films, 337
Electrocatalytic applications
poly(*o*-toluidine); deposition of Pt and, 355
Electrochemical polymerization
of *N*-substituted thieno[2,3-*c*]pyrrole, 33
Electrochemical properties
of TCNQ derivatives with π-extended systems containing S atom, 59
Electrogravimetry
role of ion exchange in redox processes of polypyrrole/dodecyl sulfate films as studied by, using quartz crystal microbalance, 259
Electronic structure
and electron–molecular vibrational coupling in organic superconductors $ET_4Hg_{2.89}Br_8$ and $ET_2Cu(NCS)_2$; comparative studies by optical spectroscopy, 129
Electron–molecular vibrational coupling
in organic superconductors $ET_4Hg_{2.89}Br_8$ and $ET_2Cu(NCS)_2$, electronic structure and; comparative studies by optical spectroscopy, 129
ESR spectroscopy
polyaniline in solution; characterization of acid–base equilibria by means of optical and, 241

Graphite
Shubnikov–de Haas oscillations in stage-1 AsF_5 intercalated, 161
Graphite intercalation compound(s)
synthesis of new ternary alkali metal GICs at high pressures, 247
three-dimensional structure of $AlCl_3$ in stage-1 $AlCl_3$-GIC, 99

Infrared investigations
of pristine, doped and partially doped polypyrrole, 301
of pristine polypyrrole; is polymer called polypyrrole really poly(pyrrole-*co*-hydroxypyrrole)?, 331
Interchain spin diffusion
^{19}F NMR relaxation time T_1 and, in polyaniline trifluoromethanesulfonate, $[(-C_6H_4NH-)(CF_3SO_3)_{0.5} \cdot 0.5H_2O]_n$, 1
Iodine
solid-state NMR investigation of dopability of poly(*p*-phenylene vinylene) model compounds and corresponding polymers with I, 143
Ion exchange
role of, in redox processes of polypyrrole/dodecyl sulfate films as studied by electrogravimetry using quartz crystal microbalance, 259
Iron
intrinsically semiconducting coordination polymers of Fe(II)/Fe(III) mixed-valence complexes of *o,o'*-dihydroxyazobenzene, 325

Kinetic study
of thermal undoping in poly(3-alkylthiophenes), 21

Magnetism
of tris(dimethylamino)cyclopropenium hexacyanotrimethylenecyclopropanide and some related complexes, 39
Memory effect
of electrical conductivity upon counteranion exchange of polypyrrole films, 337
Metal dithiolate
photoconductivity of, ion-pair complexes, 111

NMR
^{19}F NMR relaxation time T_1 and interchain spin diffusion in polyaniline trifluoromethanesulfonate, $[(-C_6H_4NH-)(CF_3SO_3)_{0.5} \cdot 0.5H_2O]_n$, 1
solid-state NMR investigation of dopability of poly(*p*-phenylene vinylene) model compounds and corresponding polymer with I, 43

Optical absorption
low temperature, of polycrystalline thin films of α-quaterthiophene, α-sexithiophene and α-octithiophene, three model oligomers of polythiophene, 167
Optical spectroscopy
electronic structure and electron–molecular vibrational coupling in organic superconductors $ET_4Hg_{2.89}Br_8$ and $ET_2Cu(NCS)_2$; comparative studies by, 129
polyaniline in solution; characterization of acid–base equilibria by means of ESR and, 241
Organic superconductors
electronic structure and electron–molecular vibrational coupling in, $ET_4Hg_{2.89}Br_8$ and $ET_2Cu(NCS)_2$; comparative studies by optical spectroscopy, 129
Oxidation
of poly(*N*-hydroxypyrrole) and poly(3-phenyl-*N*-hydroxypyrrole), 65

Photoconductivity
of metal dithiolate ion-pair complexes, 111
Photoinduced absorption
from triplet excitations in poly(2-methoxy, 5-(2'-ethylhexyloxy)-*p*-phenylene vinylene) oriented by gel-processing in polyethylene, 193
Phthalocyanine
synthesis and properties of aromatic amine-bridged PcRu(II) coordination compounds, 79
Platinum
new radical-cation salts based on unsymmetrical tetraheterofulvalenes; $(MDTTTF)_4Pt(CN)_4$, first κ-phase salt, with square planar dianion, 219
poly(*o*-toluidine); deposition of Pt and electrocatalytic applications, 355
Poly(3-alkylthiophenes)
kinetic study of thermal undoping in, 21

pressure dependence of d.c. conductivity in, 313
X-ray scattering from oriented, 363
Polyaniline
counter-ion induced processibility of conducting, and of conducting polyblends of polyaniline in bulk polymers, 91
in solution; characterization of acid–base equilibria by means of optical and ESR spectroscopy, 241
synthesis of, by use of Ullmann reaction, 271
Polyaniline trifluoromethanesulfonate
^{19}F NMR relaxation time T_1 and interchain spin diffusion in $[(-C_6H_4NH-)(CF_3SO_3)_{0.5}\cdot 0.5H_2O]_n$, 1
Polyazo metals
intrinsically semiconducting coordination polymers of Fe(II)/Fe(III) mixed-valence complexes of *o,o'*-dihydroxyazobenzene, 325
Polyenes
synthesis and properties of methylene bridged, 249
Polyethylene
photoinduced absorption from triplet excitations in poly(2-methoxy, 5-(2'-ethylhexyloxy)-*p*-phenylene vinylene) oriented by gel-processing in, 193
Poly(*N*-hydroxypyrrole)
synthesis, conductivity, spectral properties and oxidation, 65
Poly(2-methoxy, 5-(2'-ethylhexyloxy)-*p*-phenylene vinylene)
photoinduced absorption from triplet excitations in, oriented by gel-processing in polyethylene, 193
Poly(*N*-methylaniline)
charge transfer interactions and redox states in, and its complexes, 231
Poly(*para*-phenylene) sulfide
model compounds, defect states in, 283
Poly(*p*-phenylene vinylene)
solid-state NMR investigation of dopability of, model compounds and corresponding polymers with I, 143
Poly(3-phenyl-*N*-hydroxypyrrole)
synthesis, conductivity, spectral properties and oxidation, 65
Polythiophene
low temperature optical absorption of polycrystalline thin films of α-quaterthiophene, α-sexithiophene and α-octithiophene, three model oligomers of, 167
Poly(*o*-toluidine)
deposition of Pt and electrocatalytic applications, 355
Polypyrrole
/dodecyl sulfate films, role of ion exchange in redox processes of, studied by electrogravimetry using quartz crystal microbalance, 259
IR investigations of pristine, doped and partially doped, 301
IR investigations of pristine; is polymer called polypyrrole really poly(pyrrole-*co*-hydroxypyrrole)?, 331
Polypyrrole films
memory effect of electrical conductivity upon counter-anion exchange of, 337
role of counter-ion in preparation of, with enhanced properties using pulsed electrochemical potential, 203
Poly(pyrrole-*co*-hydroxypyrrole)
IR investigations of pristine polypyrrole; is polymer called polypyrrole really, 331
Preparation
of 1,6-dipyrrol-1-yl-2,4-hexadiyne, and characterization, 295
Pressure dependence
of d.c. conductivity in poly(3-alkylthiophenes), 313
Properties
of aromatic amine-bridged PcRu(II) coordination compounds, 79
Pyrrole
electrochemical polymerization of *N*-substituted thieno[2,3-*c*]pyrrole, 33

Radical-cation salts
new, based on unsymmetrical tetraheterofulvalenes; $(MDTTTF)_4Pt(CN)_4$, first κ-phase salt, with square planar dianion, 219
Redox processes
cyclic spectrovoltammetry; new method to study, in conductive polymers, 181
role of ion exchange in, of polypyrrole/dodecyl sulfate films as studied by electrogravimetry using quartz crystal microbalance, 259

Redox states
charge transfer interactions and, in poly(*N*-methylaniline) and its complexes, 231
Relaxation time
^{19}F NMR, T_1 and interchain spin diffusion in polyaniline trifluoromethanesulfonate, $[(-C_6H_4NH-)(CF_3SO_3)_{0.5}\cdot 0.5H_2O]_n$, 1
Ruthenium
synthesis and properties of aromatic amine-bridged PcRu(II) coordination compounds, 79

Shubnikov–de Haas oscillations
in stage-1 AsF_5 intercalated graphite, 161
Spectral properties
of poly(*N*-hydroxypyrrole) and poly(3-phenyl-*N*-hydroxypyrrole), 65
Structure
three-dimensional, of $AlCl_3$ in stage-1 $AlCl_3$-GIC, 99
of $Ti(OBu)_4$–$AlET_3$ catalyst before and after heat treatment, 49
Sulfur
syntheses, electrochemical properties and crystal structure of TCNQ derivatives with π-extended systems containing S atom, 59
Synthesis
of aromatic amine-bridged PcRu(II) coordination compounds, 79
of methylene bridged polyenes, and properties, 249
of new ternary alkali metal GICs at high pressures, 247
of polyaniline by use of Ullmann reaction, 271
of poly(*N*-hydroxypyrrole) and poly(3-phenyl-*N*-hydroxypyrrole), 65
of TCNQ derivatives with π-extended systems containing S atom, 59

Tetracyano-*p*-quinodimethane
syntheses, electrochemical properties and crystal structure of TCNQ derivatives with π-extended systems containing S atom, 59
Tetraheterofulvalenes
new radical-cation salts based on unsymmetrical; $(MDTTTF)_4Pt(CN)_4$, first κ-phase salt, with square planar dianion, 219
Thermal undoping
kinetic study of, in poly(3-alkylthiophenes), 21
Thieno[2,3-*c*]pyrrole
electrochemical polymerization of *N*-substituted, 33
Titanium
structure investigation of $Ti(OBu)_4$–$AlEt_3$ catalyst before and after heat treatment, 49
Tris(dimethylamino)cyclopropenium hexacyanotrimethylenecyclopropanide
magnetism of, and some related complexes, 39
Two-dimensional metal
possible phases of, with nearly half-filled band, 7

Ullmann reaction
synthesis of polyaniline by use of, 271

X-ray scattering
from oriented poly(3-alkylthiophenes), 363
